

ORIGAMI MUSHROOM

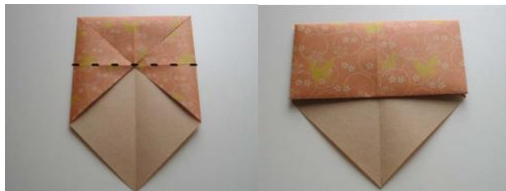

► Start with a square origami paper, color side down. Make 2 folds: one along each diagonal axis. Crease well and unfold.

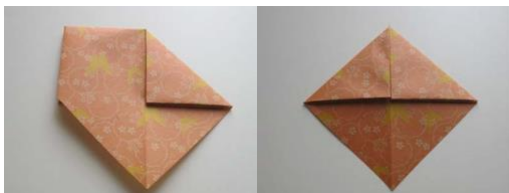

► Fold 3 sides to meet at the center, starting with the right tip, then top, then the left.

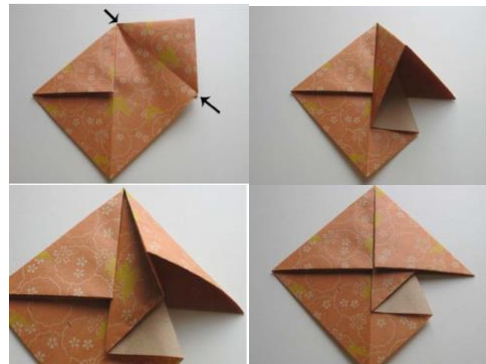

► Fold the top half of the paper over the center crease. Then flip the paper over.

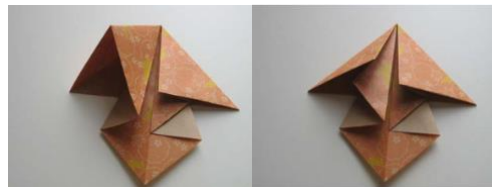

► Fold the left and right sides to meet the center crease. Make sure to crease well.

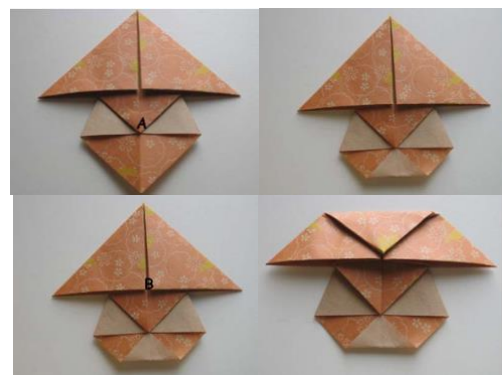

► Open the right flap and locate the crease you just made in the previous steps as indicated by the two arrows below. Fold that crease over to the center.

► Repeat on the other side.

► Fold the bottom tip to meet point A. Fold the top tip to meet point B.

► Flip paper over. Your origami mushroom is complete!
